Projects

E-Commerce Website - [GitHub](#)

- Developed a fully functional e-commerce website with React and Next.js, enabling users to browse and search for products, manage their shopping carts and wishlists, and complete secure purchases.
- Implemented TypeScript for maintainable code, Zustand for efficiently managing the application's state, Tailwind CSS for a responsive user interface, and Framer Motion for smooth animations.
- Leveraged Strapi as the headless CMS to simplify content management and integrated Stripe for secure and convenient payment processing, resulting in a seamless end-to-end e-commerce solution.

Restaurant Website - [GitHub](#)

- Developed a dynamic and user-friendly restaurant website that allows customers to easily browse through an extensive menu of delicious meals.
- Implemented a responsive design with both dark and light themes, ensuring an optimal browsing experience across various devices and preferences.
- Utilized JavaScript, React, Tailwind CSS, Redux, React Router, and React Hook Form.
